Subject: FYI only, no action needed: just keeping you in the loop FW: Williams AFB Checklist - V6
Attachments: Checklist v6.xlsx

Just wanted you both to be in the loop. Per the below, I sent today's edits out to Karla, Bo, Doug, and Dan. My thought is that I can compile their responses, and then send them out to everyone for a final round for any last comments from the entire group. Let me know if this sounds good to you both.

Again, just wanted to keep you both in the loop and to let you know what stage things were at.

Thanks, and have a good evening,
E

Subject: Williams AFB Checklist - V6

Hello, All

Attached is the latest (and hopefully greatest!) version of the checklist. Items where I had questions, or where we still needed to come to a consensus, are highlighted in neon yellow. I've sometimes added specific questions, and addressed them to particular people I tried to do that in bold-faced red, within a neon yellow box.

- Karla: I have three (I think) questions specifically for you, regarding the MWs to be installed before EBR ... your name is specifically on the questions
- Bo and Doug: Can you please take another look at the modeling and mapping sections (pre, during, and post-EBR).
- Dan: Anything else in the geochemistry or microbial sections (pre, during, and post EBR)?

Please make it very clear where you've made changes (highlight the cell or text), for easier spotting during the next (and hopefully last) round of reviewing. This worked well last time, so thanks!

We talked about how it's easier if one of you does your editing, and then let the next person do theirs (just like last time) So that all edits are on one worksheet and we don't have multiple versions flying around. It would be great if this could happen again – it was very easy to keep track of things (thank you!!). Whoever is ready can go first, then the next person, etc. Doug needs Bo to work on some things first, so those two are likely to be towards the end, I would think.

I think that's it..... MANY thanks!

-E

PS: FYI only: I'll have occasional cell/email access tomorrow (Thursday) but absolutely none on Friday.
